1. The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest a television tuner having the combination as claimed, including a tuning circuit, a high frequency amplifier, a mixer, and an oscillating section, wherein the tuning circuit is made up of an inductor and plural capacitors and at least one of the capacitors is selected and connected in parallel with the inductor, and the oscillating section has at least plural oscillators which are included in an integrated circuit, and in the integrated circuit, the oscillators respectively have variable capacitors to vary a frequency of a local oscillation signal, and Groups into which a receiving frequency band is divided correspond to the oscillators on the basis of one oscillator per group, and each of the oscillators generates local oscillation frequencies depending on television signals in the corresponding group, as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
